Unit 6: Promote person-centred approaches in health and social care

Unit reference number: Y/601/8145
QCF level: 3
Credit value: 6
Guided learning hours: 41

Unit summary
This unit is aimed at those working in a wide range of settings. It provides the learner with the knowledge and skills required to implement and promote person-centred approaches.

Assessment guidance
Learning outcomes 2, 3, 4, 5 and 6 must be assessed in a real work environment.

Assessment methodology
This unit is assessed in the workplace or in conditions resembling the workplace as indicated in the Skills for Health Assessment Strategy (see Annexe D at the back of the Specification). Learners can enter the types of evidence they are presenting for assessment and the submission date against each assessment criterion. Alternatively, centre documentation should be used to record this information.
1 **Understand the application of person-centred approaches in health and social care**

*Person-centred values*: individuality; rights; choice; privacy; independence; dignity; respect; partnership.

*Application of person-centred approaches*: applying person-centred planning (PCP) in all aspects of health and social care work, particularly in relation to vulnerable individuals, eg individuals with learning difficulties, physical disabilities, mental health issues, including person-centred thinking skills, total communication, essential lifestyle planning and person-centred reviews; Carl Rogers theoretical background to person-centred counselling; the four key principles of rights, independence, choice and inclusion; reflecting the unique circumstances of individuals; understanding the influence of person-centred values; the importance of individuality; appreciation of individual rights; enabling individuals to make decisions and choices; the importance of privacy; empowering individuals to maintain independence and dignity; treating individuals with respect; respect individuals diversity, culture and values; awareness of individual vulnerability, eg illness, disability, diminished capability; importance of person-centred values for all aspects of health and social care work.

*Care plans*: individual plans documenting preferences and requirements for care and support, eg care plan, support plan, individual plan; importance of applying a person-centred approach when using care plans; negotiation and consultation in empowering individuals to make decisions and choices in relation to care and support; importance of using plans to document an individual’s needs; evaluating plans to assess effectiveness of meeting individual needs; holistic approach to meeting the needs and preferences of individuals; attention to the detail of treatment and individual provision; working with others, eg team members and colleagues, other professionals, the individual requiring care and support, families, friends, other people who are important to the individual.
2 **Be able to work in a person-centred way**

*Work in a person-centred way:* working towards person-centred outcomes, eg satisfaction with care, involvement with care, feeling of wellbeing, creating a therapeutic culture; providing the level of support required rather than what services can manage to achieve; working with the individual’s beliefs and values; providing for physical needs; having sympathetic presence; sharing decision making implementing person-centred planning; the application of person-centred values; communicate with individuals to find out their history, preferences and wishes; communicate with others, eg team members, advocates, relatives; work in ways that recognise individual beliefs and preferences; importance of working in a non-judgemental way, not discriminating against any individual; ensure equality and inclusive practice; promote the independence and autonomy of individuals; empower individuals to use their strengths and potential; adapt actions and approaches in response to an individual’s changing needs or preferences, eg changes in physical condition, changes in treatment needs or in response to individual choices.

*Complex or sensitive situations:* situations which are distressing or traumatic, eg bereavement; threatening or frightening, eg potentially violent; likely to have serious implications or consequences of a personal nature, eg involving confidential information; involving complex communication or cognitive needs, eg individuals with communication or learning difficulties

3 **Be able to establish consent when providing care or support**

*Capacity to express consent:* awareness of the factors which can influence an individual’s capacity to express their consent, eg mental impairment, physical illness, learning difficulties or language barriers; understanding how to work sensitively with individuals who may have an impaired capacity to express consent, eg adapting working approaches, using physical or communication aids, seeking help where necessary.

*Establish consent:* the process of establishing informed agreement to an action or decision with individuals; ensure individuals have access to the appropriate information; communication skills – verbal, non-verbal and written; active listening; importance of consultation and inclusive communication; respect individual’s choices; listen and respond to individuals’ questions and concerns; respond appropriately to any questions and concerns; work to resolve conflicts if consent cannot be established; seek extra support and advice where necessary
4 Be able to implement and promote active participation

Implement and promote: different ways of applying active participation to meet individual needs; working with individuals and others, eg team members, other professionals; how active participation can address the holistic needs of an individual, eg physical, emotional, spiritual; theories of motivation and changing behaviour; using incentives, eg highlighting advantages and benefits of active participation.

Active participation: empowering individuals to participate in the activities and relationships of everyday life as independently as possible; the importance of the individual as an active partner in their own care or support, rather than a passive recipient; empowering individuals to participate in their own care; the benefits for individuals of active participation, eg physical benefits, increased independence, autonomy and wellbeing; possible barriers to active participation, eg learning difficulties, physical disability or language barriers; ways to reduce barriers to active participation, eg use of physical, communication or visual aids.

5 Be able to support the individual’s right to make choices

Right to make choices: importance of individual empowerment; universal declaration of human rights; independence and autonomy of individuals; importance of impartiality, being aware of own attitudes, values and beliefs, not allowing personal views to influence an individual’s decision making; awareness of relevant legislation and agreed ways of working that influence individual rights, eg equality and human rights, disability discrimination.

Support the individual: developing respectful relationships; the importance of non-judgemental communication and inclusive information; respect individual’s choices; the use of agreed risk assessment processes to support individuals in making choices, eg health and lifestyle choices, decisions about treatment or care; awareness of actual or likely danger or harm arising from choices made, eg increased vulnerability, impact on treatment or recovery; empowering and supporting individuals to question or challenge decisions concerning them that are made by others; using own role and authority to support the individual’s right to make choices, eg being confident and assertive, knowledge of relevant legislation and agreed ways of working, being an advocate in supporting an individual’s right to choose; importance of inclusive practice and awareness of discrimination issues.
6 **Be able to promote individuals’ wellbeing**

*Wellbeing*: spiritual; emotional; cultural; religious; social; political factors.

*Promoting wellbeing*: the importance of individual identity and self-esteem; the links between identity, self-image and self-esteem; understanding emotional literacy; awareness of individual’s feelings; the importance of privacy, maintaining dignity; providing support and encouragement for individuals; respecting the spiritual, religious and cultural beliefs of individuals.

*Supporting individuals*: working in partnership to set realistic and achievable goals; empowering individuals to develop confidence and feel good about themselves; creating and maintaining a positive environment to promote the wellbeing of individuals, eg attitudes, activities, surroundings; fostering positive relationships; encouraging open communication; supporting agreed ways of working that contribute to the wellbeing of individuals.

7 **Understand the role of risk assessment in enabling a person-centred approach**

*Risk assessment*: person-centred approach in communicating risk information; empowering individuals to make informed decisions in relation to perceived risks and consequences; individuals as active participants in decision making; evaluating and appraising advantages and disadvantages, eg relating to healthy lifestyle decisions like smoking, drinking and obesity; assessing and considering the benefits and drawbacks, eg relating to specific investigations or treatment decisions; calculating risks involved, eg in relation to surgical procedures, invasive tests or life threatening situations; judging decisions, eg relating to care and support, end of life decisions; reviewing and monitoring progress, eg effectiveness of individual care plans; the impact of rights and responsibilities in risk taking; the importance of accountability; the changing nature of risk assessment, the importance of regular review in conjunction with changing individual needs.
